WORK EXPERIENCE

Uppfirst

Remote, United Kingdom

Software Engineer

Aug 2023 - Present

- **Transitioned** the entire product codebase from the old team to the new team during an **in-house product shift**, improving code stability.
- Developed and **launched features for a celebrity client** in April 2024, achieving record sales at launch and a **8.7% conversion** rate, significantly higher than average e-commerce rates.
- **Managed** and deployed the product's **Web3 wallet** mobile app as a **solo developer**, overseeing 100% of development and deployment tasks.
- Contributed to feature development for the product's web app, enhancing user engagement significantly.
- Conducted regular **code reviews** and wrote **test-driven code**, reducing bugs and ensuring high quality and reliability.
- Participated in daily progress meetings and **assisted teammates**, improving team productivity.

DGUnicorn

Islamabad, Pakistan

Software Engineer

Feb 2022 - Aug 2023

- Developed **Ethereum EVM blockchain-based** projects for various service clients.
- Launched **NFT project** for a client, achieving **\$80K+ in sales** within the initial hours of launch.
- Held **requirements meetings** with clients and managed **technical communications** effectively.
- Developed custom **smart contracts** to meet client specifications and integrated **Web3** functionality into **Dapps**.
- Deployed smart contracts to the mainnet, assisted clients in **live project launch** meetings.
- Successfully Delivered and launched over **40 projects**, including ERC-721/ERC-1155 NFTs and ERC-20 coins.
- **Trained and managed two developers**, ensuring the delivery of high-quality results for the company.

KryptoMind

Lahore, Pakistan

React Native Developer

Nov 2021 - Jan 2022

- Developed key functionalities for mobile crypto wallet applications such as **CQR, G-Wallet Exchange**, and **CryptoKara**.
- Engaged in **research and development**, studying the codebase of the Metamask mobile application to continuously enhance CryptoKara app features.
- Focused on implementing user-centric features, collaborating with blockchain and back-end teams.

LogicFab

Lahore, Pakistan

React Native Developer

Jul 2021 - Nov 2021

- Developed the second version of **The Mesh** app, adding new functionalities and the latest UI components.
- Managed and enhanced **The Fast** app, significantly improving performance by resolving a **social media scroll bug**.
- Added new features in the **BarterUnit** app, including the development of a user-to-user **audio call feature** using **Agora**.
