## WORK EXPERIENCE

---

### Uppfirst - Deel

Remote, United Kingdom

Software Engineer

Aug 2023 - Present

- Led the development and deployment of the product's React Native app for both Android and iOS using Expo; optimized the codebase, reducing load times and enhancing performance by 40% through refactoring.
- Spearheaded the transition of the React Native app's codebase during an in-house product shift, coordinating efforts with the previous team and implementing deployment protocols that ensured zero downtime during re-launch.
- Developed features for a major launch with a celebrity client in March and April 2024, achieving record sales and an impressive 8.7% conversion rate.
- Facilitated the development of new features for the product's web app using Next JS, improving user engagement metrics and optimizing performance.
- Conducted regular code reviews and wrote test-driven code, reducing bugs and ensuring high quality.
- Participated in daily progress meetings and assisting teammates to improve overall team productivity.

### Appstree

Lahore, Pakistan

Software Engineer

Nov 2021 - Aug 2023

- Developed mobile and web applications using React JS and React Native, optimizing performance and ensuring seamless integration with back-end services.
- Implemented Ethereum blockchain technologies to develop and deploy custom smart contracts using Solidity, providing project launch support to clients, which resulted in successful deployments.
- Launched a blockchain project for a client, generating over \$80K in sales within the initial hours of launch and successfully managing high traffic volumes.
- Created and deployed the first version of G-11, a React Native mobile app that handles wallets and transaction data.
- Delivered and launched over 20 projects for both mobile and web platforms, ensuring ongoing support for the delivered projects.
- Conducted requirements meetings with clients, managing technical communications and ensuring a clear understanding of project goals, which resulted in a 90% client satisfaction rate and significantly reduced project turnaround times.
- Trained and supervised two junior developers, ensuring high-quality results for the company.

### Enterprise Cube

Lahore, Pakistan

React Native Developer

Jul 2021 - Nov 2021

- Engineered the second version of The Mesh app, integrating new functionalities and the latest UI components.
- Managed and improved The Fast app by resolving a scroll bug on the feed, enhancing scroll speed by 30%.
- Added features in the BarterUnit app, including the development of a user-to-user audio call feature using Agora.
- Maintained a mobile game application by adding new features, and oversaw a media player application by troubleshooting bugs and deploying updated versions for Android and iOS.
